Preface

The National Archives of Nepal is the official institution entrusted with preserving the documentary heritage of the country. There are vast numbers of ancient documents written in various languages and scripts covering wide range of subject matter. It possesses some of the oldest and most unique products of written culture of the country. Its Tibetan section consists of ancient Tibetan manuscripts, written in Tibetan script and language which in practice in the Northern region of Nepal are considered very important due to its scripts, languages, subject matters and writing materials. These manuscripts stand as a symbol of glories Tibetan culture and civilizations and have been in use for religious, cultural and educational purpose from ancient time. These manuscript based on Buddhist philosophy are also important for the authentic knowledge of our cultural and religious diversity.

National Archives has been publishing the inventory of the documents which are in its collection. In this background the present inventory of Tibetan manuscript covers a wide range of subject matter such as Tripitak, tantra, theology, traditional medicine and healing, traditional law and custom, grammar and lexicography, history and chronology, astrology, learned and literary, rituals, architecture etc.

The inventories of approximately 3,500 Tibetan manuscripts have been alphabetically arranged in order to publish them and the second part of the inventory has been published. It includes information about 845 documents. The name of the documents is written in Tibetan and Roman script and other information in English to make it easier for people knowing both language and script to understand it. From the microfilm reel number of the documents the researcher can easily find the main documents and get the reader print.

CC-0. Nepal Sanskrit Academy, Kathmandu Collection

In this series of inventory, although briefly discussed about the subject matter of the documents, it is expected to act as a guideline for the researchers. This inventory gives basic information about Tibetan documents which can be helpful for the researchers to get and study the documents easily.

I would like to thank Mr. Jagannath Upadhyaya, Research Officer for providing appreciable help in editing and Mr. Punya Prasad Parajuli and Mr. Mohan Singh Lama for preparing the inventory and for completion of the work. I would also like to thank my helpful colleagues of National Archives who have been involved in the completion of this work. In spite of careful observation there might have crept in some errors and alterations in the presentation of subject matter. We would be grateful if the readers suggest and comment on any of our mistakes that we might have made on completion of this inventory.
